

2024 HISPANIA CATALOGUE^{50Hz}

HFC/HFO (A2L) EVAPORATORS

CERTIFICATE CERTIFICADO

**MACHINERY DIRECTIVE,
ELECTROMAGNETIC COMPATIBILITY DIRECTIVE
ATTESTATION OF CONFORMITY**

Technical file of the company mentioned below has been inspected and audit has been completed successfully.
2006/42/EC Machinery Directive has been and 2014/30/EU Electromagnetic Compatibility has been taken as references for these processes.

Company Name : **TAIZHOU HISPANIA REFRIGERATION EQUIPMENT CO., LTD**

Company Address : B-10 Taizhou Economic Zone, Jiangsu, China

Related Directives and Annex : **2006/42/EC Machinery Directive / Annex VIII
2014/30/EU Electromagnetic Compatibility Directive / Annex II**

Related Standards : **EN ISO 12100:2010; EN IEC 61000-6-2:2019
EN 61000-6-3:2021; EN 60204-1:2018**

Product Name : **UNIT AIR COOLER**

Report No and Date : **ZNCT231219001; ZNCT231219004**

Product Brand/Model/Type : **HEA, HEB, HEC, HEF, HEJ, HER, HEV, HEW, HEP, NEA, NEB,
NEC, NED, NEF, NEJ, NER, NEV, NEW, NEP, AEA, AEB, AEC, AED,
AEF, AEJ, AER, AEW, AEX, AEA, CER, CEC, CED, CEF, CEJ,
CEV, CEW, CEP, GEA, GEB, GEC, GED, GEF, GEJ, GER,
GEV, GEW, GEP**

Certificate Number : **M.2024.206.C95839**

Initial Assessment Date : **17.01.2024**

Registration Date : **18.01.2024**

Relapse Date/No : **-**

Expiry Date : **17.01.2029**

The validity of the certificate can be checked through www.udem.com.tr. Upon completion of EC declaration of conformity, it is used solely at the manufacturer's responsibility. The certificate remains the property of UDEM International Certification Auditing Training Centre Industry and Trade Inc. Co. to whom it must be returned upon request. The above named firm must keep a copy of the certificate for 15 years from the registration of certificate. The certificate only covers the products listed above and UDEM must be notified in case of any changes on the products.

UDPM/ED-BA-3000-0003.01.2024

CERTIFICATE

No. 8603995

This is to certify that the conformity based on full quality assurance issued according to part 11 of Annex III of the Directive 2014/68/EU and implemented by government Decision No.219/2016 Coll., as amended is of the company

Taizhou Hispania Refrigeration Equipment Co.,Ltd
B-10 Taizhou Economic Zone,
Jiangsu Province
P.R. China

has been assessed and found to be in compliance with the Directive

PED 2014/68/EU - Module H
conformity based on full quality assurance
applicable to design and manufacturing of

Condenser, Condensing unit

The certificate has been issued under No. 8603995 for the registration period from 01 March 2024 to 09 February 2027.
The first certificate date of issue is 01 March 2024. Authorization is hereby given to use the LL-C Notified Body Identification Number 2435 in accordance with the requirements of the specified Directive and Regulations in relation to the products as identified above. The annex is an integral part of the certificate

Approved by  Printed by 

validity code: **F5C29185-96B**

EFICIENCIA: AEJ & AEJ Plus | 36 |
| 44 | - EVAPORADORES DE TIPO AIRE DE TECHO DE DOBLE
DESCARGA: AED | 44 |

COMMERCIAL CUBIC EVAPORATORS

EVAPORADORES CÚBICOS COMERCIALES

The AEA range of commercial cubic evaporators has been designed for use in cold rooms for the preservation of fresh and frozen products.

The exchange coils used in the AEA range are highly efficient with special profile aluminum fins and $\varnothing 12$ mm internally grooved copper tubes, with a reduced internal volume to reduce the necessary refrigerant charge, meeting the needs of the different international regulations for the reduction of gases with high greenhouse effect. They are supplied clean and tested under a pressure of 30 bar.

The AEA range has models with 3 different fin pitch depending on the temperature of the cold room:

- AEA XXXX XX 4X: with 4 mm pitch, suitable for high temperatures in the cold room ($R_t \geq 0^\circ\text{C}$)
- AEA XXXX XX 6X: with 6 mm pitch, suitable for medium temperatures in the cold room ($R_t \geq -18^\circ\text{C}$)
- AEA XXXX XX 9X: with 9 mm pitch, suitable for low temperatures in the cold room ($R_t \geq -35^\circ\text{C}$)

The standard electric fans used in this range have the following characteristics:

- $\varnothing 250, 300, 350, 400$ mm: single-phase 230V/1/50 Hz with external rotor, with type K grid and nozzle (short mouth). Operating temperature -40°C to $+40^\circ\text{C}$.

AEA SERIES EVAPORATOR

EVAPORADORES SERIE AEA

La gama de evaporadores cúbicos comerciales AEA ha sido diseñada para su uso en cámaras frigoríficas de conservación de productos frescos y congelados.

Los serpentines de intercambio utilizados en la gama AEA son de alta eficiencia con aletas de aluminio de perfil especial y tubos ranurados interiormente $\varnothing 12$ mm, con un volumen interno reducido para disminuir la carga de refrigerante necesaria, cumpliendo las necesidades de las diferentes normativas internacionales para la disminución de los gases de alto efecto invernadero. Se suministran limpias y probadas a una presión de 30 bar.

La gama AEA dispone de modelos con 3 diferentes separaciones de aleta según la temperatura de la cámara:

- AEA XXXX XX 4X: con separación de 4 mm, aptos para altas temperaturas de cámara ($R_t \geq 0^\circ\text{C}$)
- AEA XXXX XX 6X: con separación de 6 mm, aptos para medias temperaturas de cámara ($R_t \geq -18^\circ\text{C}$)
- AEA XXXX XX 9X: con separación de 9 mm, aptos para bajas temperaturas de cámara ($R_t \geq -35^\circ\text{C}$)

Los motoventiladores eléctricos estándar utilizados en esta gama tienen las siguientes características:

- $\varnothing 250, 300, 350, 400$ mm: monofásicos 230V/1/50 Hz de rotor externo, con rejilla y grilla tipo K (embocadura corta). Temperatura de funcionamiento -40°C a $+40^\circ\text{C}$.

HEA SERIES EVAPORATOR

EVAPORADORES SERIE HEA

-ø450 mm: three-phase 400V/3/50 Hz with external rotor, with type K grid and nozzle (short mouth). Operating temperature -40°C to +40°C.

White powder-coated aluminium casing with high resistance to corrosion and impacts.

In models with electric defrost, stainless steel electric AEaters covered by aluminum tubes are used, located in the finned package and in the drip tray to avoid steam problems and make easy replacement.

The electrical parts are connected to an earth terminal, inside a connection box with access holes equipped with cable glands with IP 65 protection.

For performance at work points other than those in this catalog, use the "Unit Selector Hybrid HISPANIA" software.

For special applications and additional information consult our Technical Department.

-ø450 mm: trifásicos 400V/3/50 Hz de rotor externo, con rejilla y grilla tipo K (embocadura corta). Temperatura de funcionamiento -40°C a +40°C.

La carcasa de aluminio pintado en blanco con polvo electrostático de alta resistencia a la corrosión y a los impactos.

En los modelos con desescarche eléctrico se usan resistencias en acero inoxidable cubiertas por tubos de aluminio, situados en el paquete de aletas y en la bandeja de drenaje para evitar problemas de vapor y facilitar la sustitución.

Las partes eléctricas están conectadas a un terminal de tierra, dentro de una caja de conexiones con orificios de acceso equipados con recubrimiento de cables con grado de protección IP 65.

Para trabajos con distintos rendimientos a los de este catálogo utilice el software "Unit Selector Hybrid HISPANIA".

Para aplicaciones especiales e informaciones adicionales consultar a nuestro Departamento Técnico.

EVAPORATORS/ EVAPORADORES HFC/HFO(A2L)

AVAILABLE OPTIONS FOR AEA SERIES:

Defrost options:

- Without defrost (air)
- D: Electrical defrost: standard model
- HG: hot gas
- W: water
- HGD: hot gas defrost for coil and electrical defrost for tray
- WD: water and electrical

Tube material options:

- Copper: standard models
- 1: Stainless steel AISI SUS304

Coil protection options:

- Aluminium fins: standard models
- Fins with GOLDFIN anti-corrosion high resistance coating.

Fan options:

- EC Fans
- Silica gel AEaters for fan nozzles: only for ø500 mm or above models
- Streamers: Air-guiding device for increased airthrow

Casing options:

- White powder-coated painted aluminium: standard models
- 2: stainless steel AISI SUS304

Other options:

- Double insulated drip tray (recommended for low temperature room applications)
- Thermal protector for defrosting electrical AEaters

OPCIONES DISPONIBLES PARA LA SERIE AEA:

Opciones de desescarche:

- Sin desescarche (aire)
- D: Desescarche eléctrico: modelo estándar
- HG: Gas caliente
- W: agua
- HGD: gas caliente en serpentín y eléctrico en bandeja
- WD: agua y eléctrico

Opciones material tubos:

- Cobre: modelo estándar
- 1: Acero inoxidable AISI SUS304

Opciones protección de serpentín:

- Aleta de aluminio: modelo estándar
- Aleta con tratamiento GOLDFIN con anticorrosión de alta resistencia.

Opciones ventiladores:

- Ventiladores EC
- Resistencias calefactoras para aro de ventiladores: sólo para modelos ø500 mm o más grandes
- Streamers: Dispositivo de aire guiado para incrementar el tiro de aire.

Opciones carcasa:

- Aluminio pintado al polvo blanco: modelos estándar
- 2: acero inoxidable AISI SUS304

Otras opciones:

- Bandeja de goteo con doble aislamiento (recomendada en aplicaciones con cámaras de baja temperatura)
- Protector térmico para resistencias de desescarche

COMPACT-CEILING AIR TYPE EVAPORATORS

EVAPORADORES COMPACTOS TIPO CUÑA

The AEC range of compact-ceiling air type evaporators has been designed for use in low height commercial cold rooms for the preservation of fresh and frozen products.

The exchange coils used in the AEC range are built with geometries of recognized high efficiency, with special profile aluminum fins and $\varnothing 12$ mm internally grooved (AEC 25XX, AEC Plus 30XX) or $\varnothing 15$ mm (AEC 30XX) high quality copper tubes, with high AEAt transfer coefficient. They are supplied clean and tested under a pressure of 30 bar.

The AEC range has models with different fin pitch depending on the temperature of the cold room:

For high temperatures in the cold room

- AEC 25XX XX 4X: with 4 mm pitch ($R_t \geq 0^\circ\text{C}$)
- AEC Plus 30XX XX 4X: with 4 mm pitch ($R_t \geq 0^\circ\text{C}$)
- AEC 30XX XX 4.5X: with 4.5 mm pitch ($R_t \geq 0^\circ\text{C}$)

For medium temperatures in the cold room

- AEC 25XX XX 6X: with 6 mm pitch ($R_t \geq -18^\circ\text{C}$)
- AEC Plus 30XX XX 6X: with 6 mm pitch ($R_t \geq -18^\circ\text{C}$)
- AEC 30XX XX 7X: with 7 mm pitch ($R_t \geq -20^\circ\text{C}$)

For low temperatures in the cold room

- AEC 25XX XX 9X: with 9 mm pitch ($R_t \geq -35^\circ\text{C}$)
- AEC Plus 30XX XX 9X: with 9 mm pitch ($R_t \geq -35^\circ\text{C}$)
- AEC 30XX XX 10X: with 10 mm pitch ($R_t \geq -35^\circ\text{C}$)

AEC SERIES EVAPORATOR

EVAPORADORES SERIE AEC

La gama de evaporadores tipo cuña AEC ha sido diseñada para su uso en cámaras frigoríficas comerciales de poca altura para conservación de productos frescos y congelados.

Los baterías de intercambio utilizadas en la gama AEC están contruidos con geometrías de reconocida alta eficiencia, con aletas de aluminio de perfil especial y tubos de cobre de $\varnothing 12$ mm estriado interiormente (AEC 25XX, AEC Plus 30XX) o $\varnothing 15$ mm (AEC 30XX), de alta calidad, con un alto coeficiente de transferencia de calor. Se suministran limpias y probadas a una presión de 30 bar.

La gama AEC dispone de modelos con diferentes pasos de aleta según la temperatura de la cámara:

Para altas temperaturas de cámara

- AEC 25XX XX 4X: separación de 4 mm ($R_t \geq 0^\circ\text{C}$)
- AEC Plus 30XX XX 4X: separación de 4 mm ($R_t \geq 0^\circ\text{C}$)
- AEC 30XX XX 4.5X: separación de 4,5 mm ($R_t \geq 0^\circ\text{C}$)

Para medias temperaturas de cámara

- AEC 25XX XX 6X: separación de 6 mm ($R_t \geq -18^\circ\text{C}$)
- AEC Plus 30XX XX 6X: separación de 6 mm ($R_t \geq -18^\circ\text{C}$)
- AEC 30XX XX 7X: separación de 7 mm ($R_t \geq -20^\circ\text{C}$)

Para bajas temperaturas de cámara

- AEC 25XX XX 9X: con separación de 9 mm ($R_t \geq -35^\circ\text{C}$)
- AEC Plus 30XX XX 9X: con separación de 9 mm ($R_t \geq -35^\circ\text{C}$)
- AEC 30XX XX 10X: con separación de 10 mm ($R_t \geq -35^\circ\text{C}$)

AEC & AEC Plus SERIES EVAPORATOR

EVAPORADORES SERIE AEC & AEC Plus

The standard electric fans used in this range have the following characteristics:

-Single-phase 230V/1/50 Hz with external rotor, with type K grid and nozzle (short mouth). Operating temperature -40°C to +40°C.

White powder-coated aluminium casing with high resistance to corrosion and impacts.

In models with electric defrost, stainless steel electric AEaters covered by aluminum tubes are used, located in the finned package and in the drip tray to avoid steam problems and make easy replacement.

The electrical parts are connected to an earth terminal, inside a connection box with access holes equipped with cable glands with IP 65 protection.

For performance at work points other than those in this catalog, use the "Unit Selector Hybrid HISPANIA" software.

For special applications and additional information consult our Technical Department.

Los motoventiladores eléctricos estándar utilizados en esta gama tienen las siguientes características:

-Monofásicos 230V/1/50 Hz de rotor externo, con rejilla y baffle tipo K (embocadura corta). Temperatura de funcionamiento -40°C a +40°C.

La carcasa de aluminio pintado en blanco al polvo electrostático con alta resistencia a la corrosión y a los impactos.

En los modelos con desescarche eléctrico se usan resistencias en acero inoxidable cubiertas por tubos de aluminio, situados en el paquete aleteado y en la bandeja de drenaje para evitar problemas de vapor y facilitar la sustitución.

Las partes eléctricas están conectadas a un terminal de tierra, dentro de una caja de conexiones con orificios de acceso equipados con prensaestopas con grado de protección IP 65.

Para rendimientos en puntos de trabajo distintos a los de este catálogo utilizar el software "Unit Selector Hybrid HISPANIA".

Para aplicaciones especiales e informaciones adicionales consultar a nuestro Departamento Técnico.

EVAPORATORS/ EVAPORADORES HFC/HFO(A2L)

AVAILABLE OPTIONS FOR AEC SERIES:

Defrost options:

- Without defrost (air)
- D: Electrical defrost: standard model
- HG: hot gas
- W: water
- HGD: hot gas defrost for coil and electrical defrost for tray
- WD: water and electrical

Tube material options:

- Copper: standard models
- 1: Stainless steel AISI SUS304

Coil protection options:

- Aluminium fins: standard models
- Fins with GOLDFIN anti-corrosion high resistance coating.

Fan options:

- EC Fans

Casing options:

- White powder-coated painted aluminium: standard models
- 2: stainless steel AISI SUS304

Other options:

- Thermal protector for defrosting electrical AEAters

OPCIONES DISPONIBLES PARA LA SERIE AEC:

Opciones de desescarche:

- Sin desescarche (aire)
- D: Desescarche eléctrico: modelo estándar
- HG: Gas caliente
- W: agua
- HGD: gas caliente en serpentín y eléctrico en bandeja
- WD: agua y eléctrico

Opciones material tubos:

- Cobre: modelo estándar
- 1: Acero inoxidable AISI SUS304

Opciones protección de serpentín:

- Aleta de aluminio: modelo estándar
- Aleta con tratamiento GOLDFIN con anticorrosión de alta resistencia.

Opciones ventiladores:

- Ventiladores EC

Opciones carcasa:

- Aluminio pintado al polvo blanco: modelos estándar
- 2: acero inoxidable AISI SUS304

Otras opciones:

- Protector térmico para resistencias de desercarche

HIGH EFFICIENCY COMPACT-CEILING AIR TYPE EVAPORATORSEVAPORADORES EVAPORADORES COMPACTOS TIPO CUÑA DE ALTA EFICIENCIA

The AEJ range of compact-ceiling air type evaporators has been designed for use in low height commercial cold rooms for the preservation of fresh and frozen products.

The exchange coils used in the AEJ range are highly efficient with special profile aluminum fins and $\varnothing 9.52$ mm internally grooved copper tubes, with a reduced internal volume to reduce the necessary refrigerant charge, meeting the needs of the different international regulations for the reduction of gases with high greenhouse effect. They are supplied clean and tested under a pressure of 30 bar.

The AEJ range is subdivided into two series with different fin pitches depending on the chamber temperature:

- AEJ: For medium room temperatures ($R_t \geq -10^\circ\text{C}$) with alternate fin pitch 3.2/6.4 mm and electric defrost.
- AEJ Plus: For low room temperatures ($R_t \geq -25^\circ\text{C}$) with alternate fin pitch 4.5/9 mm and electric defrost.

AEJ SERIES EVAPORATOR

EVAPORADORES SERIE AEJ

La gama de evaporadores tipo cuña AEJ ha sido diseñada para su uso en cámaras frigoríficas comerciales de poca altura para conservación de productos frescos y congelados.

Los baterías de intercambio utilizadas en la gama AEJ son de alta eficiencia con aletas de aluminio de perfil especial y tubos estriados interiormente $\varnothing 9.52$ mm, con un volumen interno reducido para disminuir la carga de refrigerante necesaria, cumpliendo las necesidades de las diferentes normativas internacionales para la disminución de los gases de elevado efecto invernadero. Se suministran limpias y probadas a una presión de 30 bar.

La gama AEJ se subdivide en dos series con diferentes pasos de aleta según la temperatura de la cámara:

- AEJ: Para medias temperaturas de cámara ($R_t \geq -10^\circ\text{C}$) con paso de aleta alternado 3,2/6,4 mm y desescarche eléctrico.
- AEJ Plus: Para bajas temperaturas de cámara ($R_t \geq -25^\circ\text{C}$) con paso de aleta alternado 4,5/9 mm y desescarche eléctrico.

AEJ & AEJ Plus SERIES EVAPORATOR

EVAPORADORES SERIE HEJ & HEJ Plus

The standard electric fans used in this range have the following characteristics:

-Single-phase 230V/1/50 Hz with shaded pole motor, ø200 mm, with grid and short nozzle. Operating temperature -30°C to +40°C.

White powder-coated aluminium casing with high resistance to corrosion and impacts.

In models with electric defrost, stainless steel electric AEaters covered by aluminum tubes are used, located in the finned package and in the drip tray to avoid steam problems and make easy replacement.

The electrical parts are connected to an earth terminal, inside a connection box with access holes equipped with cable glands with IP 65 protection.

For performance at work points other than those in this catalog, use the "Unit Selector Hybrid HISPANIA" software.

For special applications and additional information consult our Technical Department.

Los motoventiladores eléctricos estándar utilizados en esta gama tienen las siguientes características:

-Monofásicos 230V/1/50 Hz con motor de polo sombreado, de ø200 mm, con rejilla y embocadura corta. Temperatura de funcionamiento -30°C a +40°C.

La carcasa de aluminio pintado en blanco al polvo electrostático con alta resistencia a la corrosión y a los impactos.

En los modelos con desescarche eléctrico se usan resistencias en acero inoxidable cubiertas por tubos de aluminio, situados en el paquete aleteado y en la bandeja de drenaje para evitar problemas de vapor y facilitar la sustitución.

Las partes eléctricas están conectadas a un terminal de tierra, dentro de una caja de conexiones con orificios de acceso equipados con prensaestopas con grado de protección IP 65.

Para rendimientos en puntos de trabajo distintos a los de este catálogo utilizar el software "Unit Selector Hybrid HISPANIA".

Para aplicaciones especiales e informaciones adicionales consultar a nuestro Departamento Técnico.

AVAILABLE OPTIONS FOR AEJ SERIES:

Defrost options:

- Without defrost (air)
- D: Electrical defrost: standard model

Tube material options:

- Copper: standard models
- 1: Stainless steel AISI SUS304

Coil protection options:

- Aluminium fins: standard models
- Fins with GOLDFIN anti-corrosion high resistance coating.

Fan options:

- EC Fans

Casing options:

- White powder-coated painted aluminium: standard models
- 2: stainless steel AISI SUS304

Other options:

- Thermal protector for defrosting electrical AEaters

OPCIONES DISPONIBLES PARA LA SERIE AEJ:

Opciones de desescarche:

- Sin desescarche (aire)
- D: Desescarche eléctrico: modelo estándar

Opciones material tubos:

- Cobre: modelo estándar
- 1: Acero inoxidable AISI SUS304

Opciones protección de serpentín:

- Aleta de aluminio: modelo estándar
- Aleta con tratamiento GOLDFIN con anticorrosión de alta resistencia.

Opciones ventiladores:

- Ventiladores EC

Opciones carcasa:

- Aluminio pintado al polvo blanco: modelos estándar
- 2: acero inoxidable AISI SUS304

Otras opciones:

- Protector térmico para resistencias de desercarche

DUAL DISCHARGE CEILING AIR TYPE EVAPORATORS

EVAPORADORES TIPO TECHO

The AED range of compact-ceiling air type evaporators has been designed for use in low/medium height cold rooms for the preservation of fresh and frozen products and processing rooms as well.

The exchange coils used in the AED range are built with geometries of recognized high efficiency, with special profile aluminum fins and $\varnothing 9.52$ mm (AED 25XX) or $\varnothing 12$ mm (AED 35XX) internally grooved or $\varnothing 15$ mm (AEC 40XX and above) high quality copper tubes, with high AEA transfer coefficient. They are supplied clean and tested under a pressure of 30 bar.

The AED range has models with different fin pitch depending on the temperature of the cold room/processing room:

For high temp. in the cold/processing room:

- AED 25XX XX 4.5X: with 4.5 mm pitch ($R_t \geq 0^\circ\text{C}$)
- AED 35XX XX 4X and above: with 4 mm pitch ($R_t \geq 0^\circ\text{C}$)

For medium temperatures in the cold room:

- AED 35XX XX 6X: with 6 mm pitch ($R_t \geq -18^\circ\text{C}$)

AED SERIES EVAPORATOR

EVAPORADORES SERIE AED

La gama de evaporadores tipo techo AED ha sido diseñada para su uso en cámaras frigoríficas de poca/media altura para conservación de productos frescos y congelados, así como salas de trabajo.

Las bobinas de intercambio utilizadas en la gama AED están construidas con geometrías de reconocida alta eficiencia, con aletas de aluminio de perfil especial y tubos de cobre de alta calidad de $\varnothing 9.52$ mm (AED 25XX) o $\varnothing 12$ mm (AED 35XX) ranurados internamente o de $\varnothing 15$ mm (AEC 40XX y superior), con alto coeficiente de transferencia de calor.

La gama AED dispone de modelos con diferentes pasos de aleta según la temperatura de la cámara/sala de trabajo:

Para altas temperaturas de cámara/sala:

- AED 25XX XX 4.5X: separación de 4,5 mm ($R_t \geq 0^\circ\text{C}$)
- AED 35XX XX 4X y mayores: separación de 4 mm ($R_t \geq 0^\circ\text{C}$)

Para medias temperaturas de cámara:

- AED 35XX XX 6X: separación de 6 mm ($R_t \geq -18^\circ\text{C}$)

AED & AED Plus SERIES EVAPORATOR

EVAPORADORES SERIE AED & AED Plus

AVAILABLE OPTIONS FOR AED SERIES:

Defrost options:

- Without defrost (air)
- D: Electrical defrost: standard model
- HG: hot gas
- W: water
- HGD: hot gas defrost for coil and electrical defrost for tray
- WD: water and electrical

Tube material options:

- Copper: standard models
- 1: Stainless steel AISI SUS304

Coil protection options:

- Aluminium fins: standard models
- Fins with GOLDFIN anti-corrosion high resistance coating.

Fan options:

- EC Fans

Casing options:

- White powder-coated painted aluminium: standard models
- 2: stainless steel AISI SUS304

Other options:

- Double insulated drip tray (recommended for low temperature room applications)
- Thermal protector for defrosting electrical AEAters

OPCIONES DISPONIBLES PARA LA SERIE AED:

Opciones de desescarche:

- Sin desescarche (aire)
- D: Desescarche eléctrico: modelo estándar
- HG: Gas caliente
- W: agua
- HGD: gas caliente en serpentín y eléctrico en bandeja
- WD: agua y eléctrico

Opciones material tubos:

- Cobre: modelo estándar
- 1: Acero inoxidable AISI SUS304

Opciones protección de serpentín:

- Aleta de aluminio: modelo estándar
- Aleta con tratamiento GOLDFIN con anticorrosión de alta resistencia.

Opciones ventiladores:

- Ventiladores EC

Opciones carcasa:

- Aluminio pintado al polvo blanco: modelos estándar
- 2: acero inoxidable AISI SUS304

Otras opciones:

- Bandeja de goteo con doble aislamiento (recomendada en aplicaciones con cámaras de baja temperatura)
- Protector térmico para resistencias de desercarche
