

视频麻醉喉镜

(SPMHP-001型)

视频喉镜由电源适配器、电源管理及系统控制电路板、液晶显示器、手柄、支撑管(含摄像头和光源)及喉镜片组成。

喉镜片的材料采用ABS(丙烯腈-丁二烯-苯乙烯共聚物)塑料制成。

本产品供医疗机构在麻醉及抢救时经口导入气管插管用。

Video laryngoscope by the power adapter, power management and system control circuit board, a liquid crystal display, a handle, a supporting tube (including the camera and the light source and lens composition).

Lens material using ABS (acrylonitrile butadiene styrene copolymer) plastic.

This product is for the medical institutions in the anesthesia and the rescue by the export import trachea inserting tube.

设备所属类别：Ⅱ类

Equipment category: Class II

设备所属类型：B型

The device type: B type

设备应用部分：喉镜片

Application of part of the equipment: lens

**设备属可手持式设备，非永久性
安装设备**

Equipment is the hand-held equipment, non permanent installation of equipment

设备的运行：连续运行

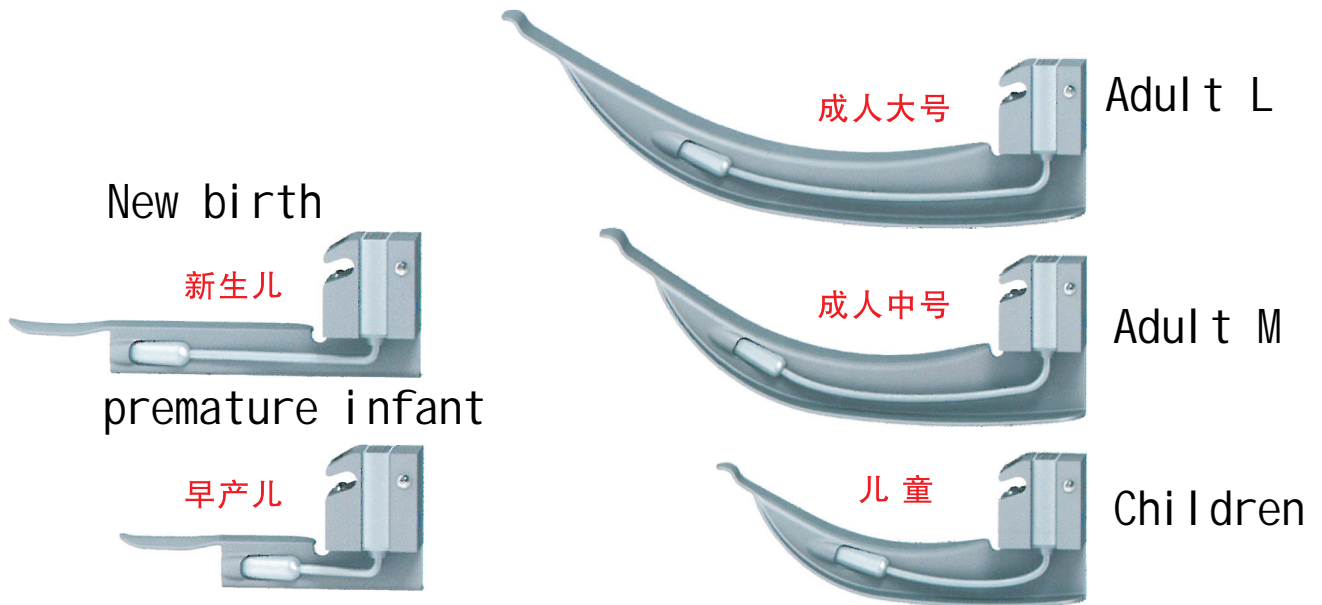

Equipment operation: continuous operation

**与之相配套的电源适配器、液晶
显示器应采用符合国家家电CCC
强制认证。**

The power adapter, liquid crystal phase matching
The monitor should be in line with the national appliance
CCC Compulsory Certification

SPMHP-001型视频麻醉喉镜是一种新型的视频插管系统，为Ⅱ类BF型(非AP/APG型设备)、IPX7带内部电源连续运行的医疗器械设备，该设备不可与其他设备互连，其镜片前端安装一个高清晰度防雾摄像头，并由LED冷光源配合光导纤维提供光线和对比度，通过光缆将图像传递并放大至液晶显示器上。

The SPMHP-001 type video anesthetic laryngoscope is a video intubation system model, for class II BF type (non AP/APG type equipment), medical equipment IPX7 with internal power supply of continuous operation, the equipment and other equipment interconnection, the front end of the lens mounting a high resolution anti fog cameras, and the LED cold light source with optical fiber to provide light and contrast, through the cable will be enlarged to the image transfer and liquid crystal display.

标准视频

视频喉镜的LCD显示器可以清楚的显示声带和喉腔入口，提供更加解剖视野；人性化设计一键拍照功能。

电源选择

- 1、使用普配电池，可连续使用2小时，持久耐用，适合野外长期操作！
- 2、优质可充电锂电池，超长可持续待机≥300分钟。

不同规格的喉镜片，符合各种口腔结构，遇到困难插管时，它能大幅改善其操作视野。为医护人员减轻工作难度和工作压力。

Standard video

LCD display video laryngoscope vocal cord and throat inlet can be displayed clearly, provide more anatomical view; humanization design key camera function.

Selection of power supply

- 1, the use of ordinary batteries, use continuously 2 hours, durable, suitable for long-term field operation!
- 2, the high quality rechargeable lithium battery, long sustainable standby > 300 minutes.

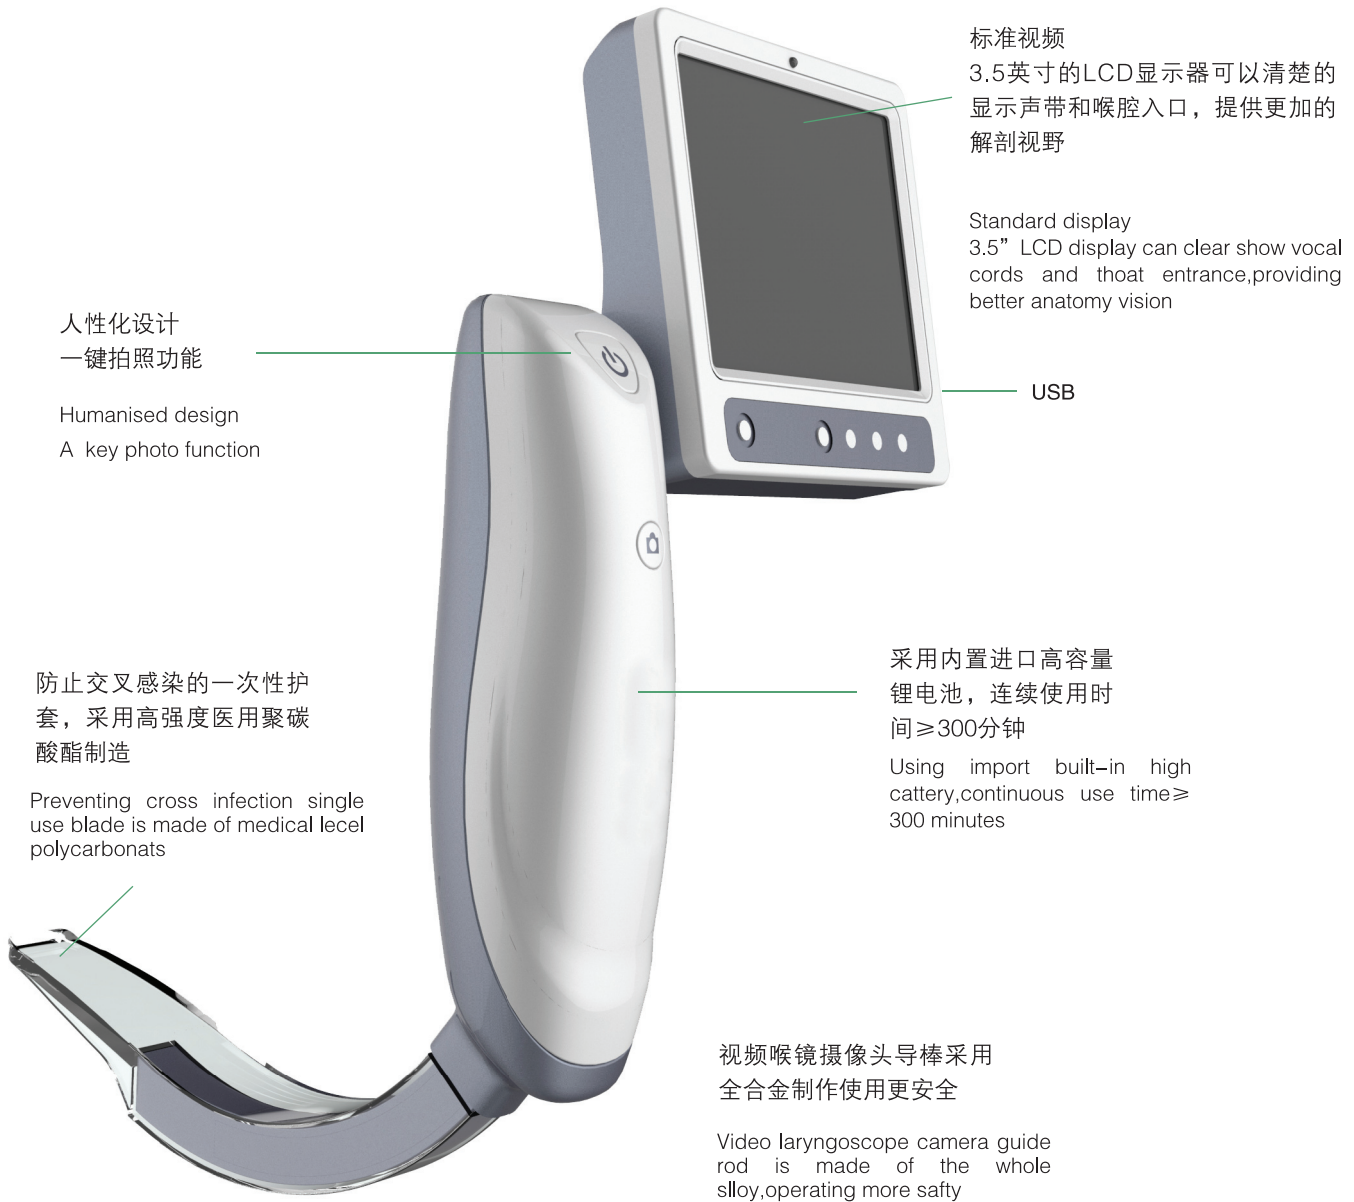

Laryngoscopic lens with different specifications, with various structures of the mouth and the difficulties encountered during intubation, it can greatly improve the operation view. For the medical staff to reduce the working difficulty and work pressure.

视频麻醉喉镜

(SPMHP-002型)

人性化设计
一键拍照功能

Humanised design
A key photo function

防止交叉感染的一次性护套，采用高强度医用聚碳酸酯制造

Preventing cross infection single use blade is made of medical level polycarbonats

标准视频

3.5英寸的LCD显示器可以清楚的显示声带和喉腔入口，提供更加解剖视野

Standard display

3.5" LCD display can clear show vocal cords and thout entrance,providing better anatomy vision

USB

采用内置进口大容量锂电池，连续使用时间≥300分钟

Using import built-in high cattery,continuous use time≥300 minutes

视频喉镜摄像头导棒采用全合金制作使用更安全

Video laryngoscope camera guide rod is made of the whole alloy,operating more safty

新款光纤可拆卸喉镜
The new fiber detachable laryngoscope

1.可拆卸光纤管

辉春康安泰可拆卸的光纤喉镜片，不仅易于清洗，并且易于灭菌和消毒，减少了交叉感染的可能性。

2.表面处理

喉镜片表面没有镀层，喉镜片采用304系列医用不锈钢制造。

3.光纤喉镜手柄

a.本公司生产的喉镜手柄有各种不同的样式，可以满足您的不同需求

b.光纤照明采用疝气灯泡。灯泡在手柄上(患者无危险)

c.灯泡其亮度和光斑的白度较普通的卤素灯泡高30%—50%

1.Detachable Fiber Optic Tube

The Detachable Fiber Optic laryngoscope of Hu i Chun KANGANTA I, the laryngoscope is not only easy to clean but easy to sterilization and disinfection, this reduces the possibility of cross infection.

2.Surface treatment

The blade surface without coating, it is made of 304 Series medical stainless steel

3.Fiber Optical laryngoscope handle

a.We can supply various laryngoscope handles, can meet your different requirements

b.Fiber optic lighting, use Hernia bulb!the bulb is in the handle, safe to patients

C.The bulb' S brightness and facula whiteness is higher 30%-50%than common halogen bulbs

经济光纤型喉镜片
Fiber laryngoscope lens for economic

特点:

A 手柄

1.极佳的制造工艺和品质，手感好。

2.位于手柄上端的灯座。给高灵敏度的卤素灯泡提供最佳保护，延长灯泡使用寿命。

3.镜片和手柄之间的精密连接技术，保证光线不损失。

B镜片

1.超强硬度的金属质叶片安全性高

2.创新的仅3.5mm的光导纤维供给高亮光源并避免在插管时高温对气道损伤。

3.绿色的塑料接口，提供高硬度和力度，特有的绿色标识适用于所有符合ISO标准的光纤手柄。

Features:

A Handles

1.Excellent produce technology and quality,feeling is good.

2.1amp-socket located in the top of the handle, offering the best protection for the High sensitivity halogen bulbs, extend the bulb' S use life

3.Tile precision connection technology between blade and handle guaranteed the light not loss

B.blades

1.Super hardness metal blades with high safety

2.The only 3.5mm fiber optic can supply high light source and avoid ailway tranma because of high tenperature during intubation

3.The Green plastic interface provide high hardness and strength, special green logo is applicable tO all fiber optic handles which fit with ISO standard.

亚光灯泡喉镜片
Yaguang lighting lens

特点:

独特的弯钩设计可协助麻醉医生解决各类疑难插管。新型的康安泰弯头喉镜运用光纤纤维装置，设计更先进，使用更方便。

1.卤素灯泡发出的冷光比普通灯泡亮度提高40%。

2.冷光源窥视片采用医用不锈钢制造，手柄配以镀金电极连接，接触好，寿命长，性能高。

3.标准手柄严格按照密封防水工艺设计制造，配有2号碱性电池，通配于各型号镜片。

4.规格齐全，多种型号的镜片可任意选配。

teature:

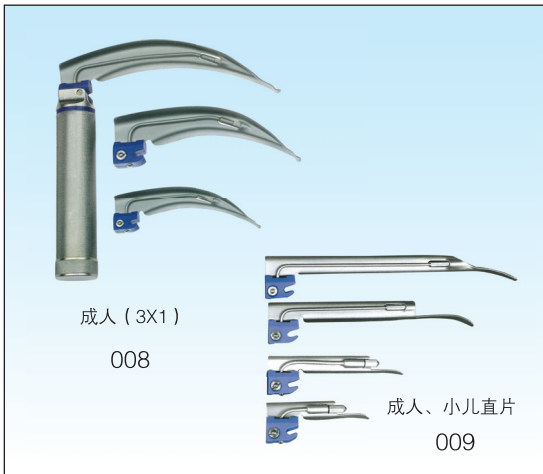

The unique hook design can help anesthesiologist to solve all kinds of difficult intubation problems. The newest KANGANTA I brand blades with curved use fiber optic device, the more advanced design, the more convenient use.

1.The cold light brightness of halogen bulbs increased by 40%than ordinary bulb

2.Cold light blade is made of medical stainless steel, the handle connected with the gold-plated electrode, connection is good, long use life, high performance.

3.The handle strictly designed according to seal waterproof technology standard with no.2 alkaline bakery,iS suitable for various of blades.

4.Complete sizes, many kinds of blades can be chosed.

灯泡可拆卸喉镜片
Bulb demountable lens

特点:

- 1.喉镜片采用一体化设计, 使用更安全, 永不会出现镜钩断裂现象。
- 2.更经济, 可以随意更换喉镜片上的任意配件, 即可使原来的镜片光亮如新。
- 3.采用无焊接工艺, 使镜片更环保, 更美观。
- 4.独立包装的可抛弃型镜片可以避免由口腔内的细菌病毒引发的交叉感染。
- 5.低廉的价格赢取更大的医疗市场。
- 6.多种规格型号可供选择。

Features:

- 1.The blades adopted an integration design, use more security,the blades never will be break.
- 2.More economy,can change all the accessories in the blade, make the blades looks like new!
- 3.Adopting no welding technology,making the blade environmental, more beautiful! Single packing single blades can avoid cross infection caused by oral bacteria virus.
- 5.Competitive price can win more medical market
- 6.Various sizes can be chosed from!

LED亚光喉镜片
Matt LED lens

本品是结合国内外同类产品而推出的一种新型实用麻醉咽喉镜

产品特点:

- 1.产品采用超亮LED发光体, 顶端扇形面高亮度可达17000mcd, 超过目前所有的麻醉咽喉镜的照明亮度, 能够为操作者提供清晰的视野。
- 2.超高亮LED属冷光源, 可防止灯泡过热灼伤口腔黏膜, 效果优于现有的进口的麻醉咽喉镜光纤冷光源。
- 3.喉镜手柄实用3粒AG10纽扣电池, 更换一次电池可连续使用无数次手术。
- 4.喉镜片采用一体化设计, 使用更安全, 永不会出现镜钩断裂现象。
- 5.采用无焊接工艺, 使镜片更环保, 更美观!

This product is a new type of practical anesthesia laryngoscope, it is a combination of domestic and foreign similar products.

Features:

- 1.Our product adopts the ultra bright LED lights, the top fan space high brightness can reach 17,000 MCD, it exceed all the anesthesia laryngoscope' S lighting intensity,can provide clear vision for the operator.
- 2.Ultra bright LED is cold light source, can avoid hot bulb burn oral mucosa, The effect is better than the existing import anesthesia laryngoscope.
- 3.The handle use 3pcs AG 10 button batteries, change one time batteries can used for many times operation !
- 4.The blades adopted an integration design, use more security,the blades will never break.
- 5.Adopting no welding technology,making the blade environmental, more beautiful !

带弯钩光纤喉镜片
Belt hook fiber laryngoscope

特点:

- 1.亚光色喉镜片采用进口医用钛合钢制成
- 2.更轻的镜片使医生操作更轻松。
- 3.超强的硬度使叶片更耐用
- 4.先进的设计, 美观的外表, 可与国外喉镜相媲美
- 5.同样的产品更经济, 使医院更实惠
- 6.亚光色喉镜的问世, 完全可取代传统喉镜, 使国产喉镜更上一个新台阶。

Features

- 1.Matte blade is made of import medical titanium alloy steel
- 2.More lighter len makes doctor operate easily!
- 3.Super hardness blade more durable
- 4.Advanced design, Beautiful appearance makes it is more better than foreign laryngoscope!
- 5.The same product our is more economical, more affordable to the hospital
- 6.Matte laryngoscope come out can totally replace the traditional laryngoscopy,make the domestic laryngoscope to a new step.

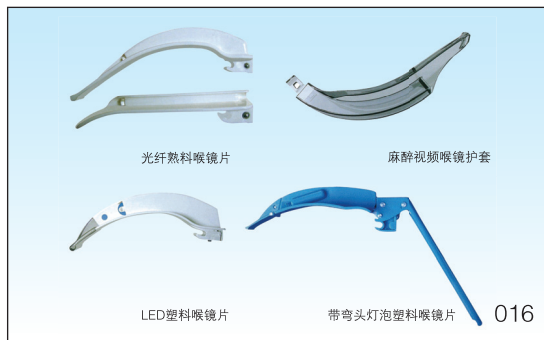

全不锈钢灯泡喉镜片
All stainless steel lamp lens

特点:

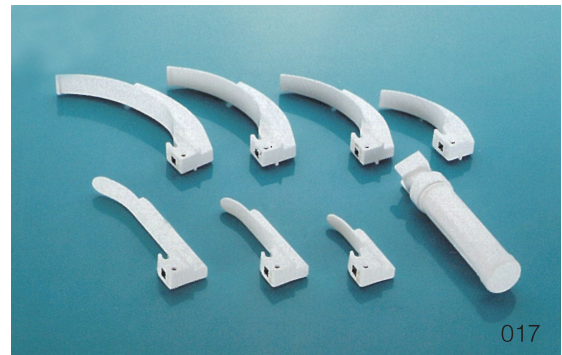

- 1.采用进口304医用不锈钢制造。
- 2.更轻的镜片使医生操作更轻松。
- 3.先进的设计, 美观的外表, 可与国外喉镜相媲美。
- 4.全不锈钢喉镜的问世, 完全可取代传统喉镜, 使国产喉镜更上一个新台阶。

Features:

- 1.Be made of 304 medical stainless steel
- 2.More lighter blades make doctor operate easily!
- 3.Advanced design, Beautiful appearance makes it is more better than foreign laryngoscope!
- 4.The stainless steel laryngoscope come out, can totally replace the traditional laryngoscopy,making the domestic laryngoscope to a new step.

► 电动气压止血仪 (ATS-1000型)

- **技术参数** 压力设定范围...1~100kpa 压力稳定精度... ± 3 kpa
时间设定范围...1~20分钟 初始充气时间... ≤ 60 s
额定电压: 1~220v
- **性能特点** 结构小巧, 操作简单; 立式支架, 多种选用件;
连接简单, 可靠, PVC外壳, 声音报警; 自动检测漏气功能;
术中可随时增减设定值, 国际流行插拔式接口;
核心零配件采用国际产品。
- **保险功能** 工作时间到自动阶梯放气, 防止患者心、脑突然缺血,
气压自动补偿
- **电 源** 在突然断电情况下能始终保持压力
- **报警功能** 声音报警: 手术剩余时间10分钟、1分钟时报警, 提醒操作员
- **记忆功能** 将上次手术使用参数自动记忆, 以供下次参照, 在该基础上设定, 可节省时间
- **充、放气功能** 快速充气: 防止动脉闭塞前, 血液充盈动脉
放 气: 阶梯放气

020

Automatic tourniquet system ATS-100

Technical parameter:

pressure set: 0~100kpa pressure stability precision: ± 3 kpa
Time set: 1~20min Initial inflate time: ≤ 60 s

Performance characteristic:

Compact structure, simple operation. Vertical support, a variety of optional part;
Connection is simple, reliable, PVC casing, voice call the police. Automatically detect leak function;
Intraoperative may at any time increase or decrease in value, the international popular plug type interface;
The core parts adopt international products.

Insurance function:

Working time to automatic ladder deflated, prevent the patient from sudden heart and brain ischemia,
Pneumatic automatic compensation

Power: In the case of suddenly loses power can always maintain pressure

Alarm function : Voice alarm: alarm operation rest for 10 minutes, 1 minutes, remind the operator

Inflation and deflation :

Fast filling: prevent artery occlusion, before filling artery blood
Deflation: ladder is deflated

Memory function : Will be the last operation using parameter automatic memory, in order to offer reference to next time, on the basis of the set, can save time

rated working voltage: 1-220 - v

电动气压止血仪YTQ-F型(触摸屏)

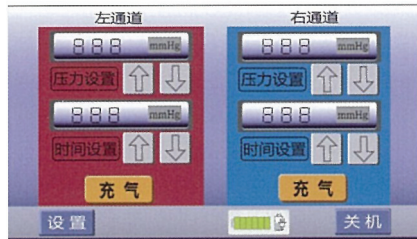

Automatic Tourniquet System YTQ-F(Touch screen)

技术特点和参数

- 7寸宽屏触摸屏设计
- 微电脑CPU控制，开机故障自检功能
- 双通道，任一通道均可独立工作
- IVRA功能，适应复杂手术
- 压力单位mmHg和Kpa选择功能，最大的压力不小于600mmHg
- 压力控制精度不低于±10mmHg
- 噪音：≤55 dB 功耗：≤25VA
- 电源输入：110V- / 220V-，50 / 60Hz

Technique feature&Parameter:

- 7" touch-widescreen design
- CPU control,self-check while opening the machine
- Double channels and each one can operate separately
- IVRA function to meet the needs of complex operation
- Pressure can choose mmHg or Kpa Max pressure is 600mmHg
- Maximum pressure: 90 Kpa(675mmHg)
- Pressure precision ≤ ± 10mmHg
- Noise: <55dB
- Power supply: 110V ~ 220V ~ ,50/60Hz

电动气压止血仪(双通)

Moving bracket for ATS

技术特点和参数

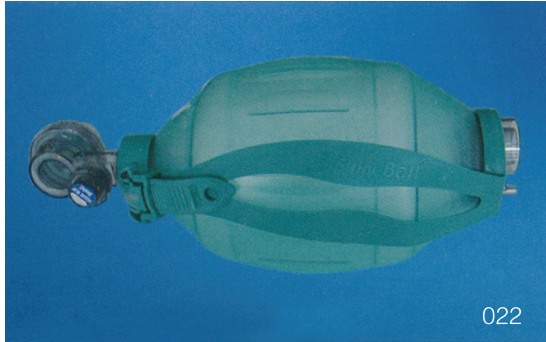

所有型号的电动气压止血仪均适用带升降结构，最大高度≥1100mm
带止血带储放框

Technique feature&Parameter

Suit 10 all models of our ATS
Height can be adjusted to 1.1 M
With basket for cuffs

Disposable Humidifying Device bottle

我公司研制开发的一次性使用吸氧湿化装置是国家专利产品，用于缺氧及低氧血症患者的吸氧治疗，临床使用甚广，解决了传统吸氧的几项弱点

1. 杜绝了传统湿化瓶的重复使用交叉感染的可能；
2. 本产品采用了五眼PE微孔湿化头，彻底清除了氧气中介质，提供了湿化效果，使患者感到舒适，吸氧效果显著；
3. 解决了传统湿化瓶反复使用，瓶体老化，有起爆的可能；
4. 操作简单，显著降低临床护理人员的工作负担。

The disposable oxygen inhalation humidifying device researched, developed and produced by our company is Chinese patent product. Its used for oxygen inhalation therapy Of patient who is sick of oxygen-poor and hypoxemia.Its application is very wide. It solves several foibles of traditional oxygen inhalation;
Prevent the possibility of cross infection caused by repeat use Of traditional humidification bottle;
Being used 5-hole PE micropore humldifying head, the product eliminates fully impurities in oxygen and provides humidifying effect and makes patient feel comfort and possesses remarkable oxygen inhalation effect;
Solve explosive possibility of traditional hUmidification bottle because of repeat use and shell ageing;
Because Of simple in operation, it relieves clinic nursing personnel work burden.
